

EDIE™

Electric Dual Injector - Enclosed

Chlorine Dioxide Generation and Injection System

Bio-Cide International's new Electric Dual Injector - Enclosed system provides a convenient and reliable way to inject chlorine dioxide in water streams.

Chlorine dioxide has long been recognized as a safe and effective sanitizer for food processing, water treatment and animal health applications. It's high antimicrobial efficacy and low toxicity, coupled with affordable economics, make it the ideal choice to meet the challenges of the sanitation industry. Unlike chlorine based sanitizers, chlorine dioxide does not chlorinate organic materials and therefore does not raise any carcinogenic concerns. It has very high oxidative capacity when compared with other common sanitizers such as chlorine or peracetic acid.

Bio-Cide International, Inc. is a single source for chlorine dioxide products and equipment that meets institutional needs. To meet the needs of most common sanitation requirements, Bio-Cide developed its advanced, compact, simple to use EDIE system.

Compatible, Ultrasonic Flow Meter available – simply clamps on to the pipe and does not require any cutting or refitting for insertion into the stream.

System Features:

- Simple to operate
- Fully automated to deliver set concentration
- Digital menu screen
- Maintenance identifying pumps
- Precursor level sensors
- Easy interface with ultrasonic flow meters
- Wall mountable design
- Durable and easy to maintain

**Environmentally
Friendly Products!**

Concentration Output (ppm)	1 – 100*
Operating Water Flow Range (GPM)	1 - 300
Operating Pressure Range (PSI)	10 - 150
Power Requirements	(2) 110V, 15 Amp
Dimensions (Inches)	24 W x 30 H x 13 D

*Max concentration will decrease as the flow rate increases above 300 GPM
